CAREER SUMMARY

Goal oriented person, very eager to learn and seeking to become an expert in my field. If you work with me you will find that I am a very passionate team player and self-motivated that doesn't micromanage, but becomes an ideal for his team, I don't shy away from delegating. Wherefore.

I've joined Sumerge Software Solutions since 2013 as a Applications support engineer, I supported a project called School eConnect, it's a school management system application which link the admin, teachers, students and parents, I solved all the application problems and also created new modules for the clients.

Then I worked as an Associate software engineer in Sumerge, to work on more projects and to redesign the School eConnect using newer technologies, algorithms and architecture.

Then I worked as a UI and UX developer, and then I worked as a Software Engineer in Sumerge.

And now I'm working as Senior Web Developer in Mediair DG

I would like to find a position where I could use the skills I have developed over the years, improve them and build new ones.

EXPERIENCE

Mediair DG, Zamalek, Giza— *Senior Web Developer*

May 2016 - PRESENT

-Develops software solutions by studying information needs; conferring with users; studying systems flow, data usage, and work processes; investigating problem areas; following the software development lifecycle.
